

# Shared Discovery Curriculum

## UPDATE November 3, 2015

This installment of the *Shared Discovery Curriculum Update* serves to inform you of work in progress and to point you to some useful information resources.

### **Work in Progress**

1. The Shared Discovery Curriculum website is under revision/reconstruction. Look for its “unveiling” soon.
2. **Chief Complaints and Concerns Boot Camp: The Sequel** continues through the end of this week. As you know, completion of these documents will finish our determination of the end-competencies of our educational program!
3. PREZI links from the October Town Hall are below:  
[SDC Town Hall Presentation PDF](#)  
[SDC Town Hall Presentation Interactive Prezi](#)
4. Mediasite recordings from all the Town Halls including the November 2 brown bag can be found on the website as well.
5. We have made considerable progress developing a **Curriculum Data Base** structure that will enable us to link our Chief Complaints and Concerns end-competencies to the ways that they are taught and the ways that they are assessed.
6. We are moving ahead with augmenting and improving our simulation space and resources so that we will be ready to incorporate Shared Discovery’s weekly simulation experiences.
7. All members of the leadership team are creating work plans with goals and timelines to achieve those goals. Progress will be posted on the website soon.

8. JustInTimeMedicine programming and testing continues. JustInTimeMedicine will house our curricular documents, resources, links, many assessments—and enable reporting of both learner and curricular outcomes.
9. Quick resources:
  - a. For a one-stop general information source, take a look at the Shared Discovery Curriculum Folio available at this link: [Shared Discovery Curriculum Folio](#)
  - b. What would happen to education if we take education evidence seriously? [\[LINK\]](#)

***10. The next Town Hall is December 7, 2015 from 4:30 to 5:30 in A219 Clinical Center and 130 Secchia Center***

**Stay tuned for the next regular update on Shared Discovery Curriculum progress!**

**Dianne Wagner, MD  
Associate Dean for Undergraduate Medical Education**
